SUMMARY

IT support professional with 1.5+ years in a Managed Service Provider (MSP) environment, supporting ~70 client accounts and ~50 service tickets per month. Strong in ticket management (Autotask PSA), Microsoft 365, end-user support, and turning repetitive manual work into automated workflows. Microsoft 365 Fundamentals (MS-900) certified and pursuing CompTIA A+. Known for moving fast, learning by building, and doing more with less.

EXPERIENCE

IT Support / MSP Account Manager | IntermixIT

Sep 2024 – Mar 2026

Full-Time · Remote

- Supported ~70 client accounts and ~50 service tickets per month in a fast-paced MSP, serving as the primary point of contact for issue intake and resolution.
- Created, tracked, prioritized, and escalated service tickets in Autotask PSA, keeping queues moving and clients informed end to end.
- Partnered with engineers on troubleshooting, project planning, procurement, and service delivery to resolve client issues.
- Built Microsoft Power Automate workflows that reduced manual data entry and accelerated ticket routing across 70+ client accounts.
- Supported internal team members with technical issues and onboarding; maintained accurate client data across CRM and Microsoft 365.
- Led and improved Quarterly Business Reviews (QBRs), raising presentation quality and delivery consistency.

Order Picker | ABARTA Coca-Cola

Sep 2023 – Apr 2024

Full-Time

- Maintained high accuracy and productivity in a fast-paced warehouse, contributing to hundreds of daily orders.
- Ensured quality control across order preparation and shipment; collaborated with the team to consistently hit daily goals.

PROJECTS

AI Customer Support Automation System — Zapier, OpenAI, Airtable, Gmail, Slack

- Multi-path automation that classifies incoming support requests, routes them (urgent/billing/technical/general), drafts context-aware replies, and logs to Airtable — with no human in the loop.

AI Text Analysis App — Python, Azure AI Language, Streamlit

- Detects language, extracts named entities, flags PII (emails, phone numbers), and outputs redacted text for compliance scanning. Deployed live.

AI Image Generator — Python, Azure OpenAI, Microsoft Foundry, Streamlit

- Web app generating images from text prompts with prompt enhancement and customizable styles; deployed for live usage.

Power Automate Workflow Suite — Power Automate, Microsoft 365, Autotask

- Workflows built at IntermixIT that cut manual data entry and sped up ticket routing across 70+ client accounts.
